BALLOON VOLLEY MAYHEM

A visit from the Children's Center led to a lively time for all. We had planned a parachute balloon bouncing activity for the kids, but they were more interested in simply bopping the balloons about. We let them lead the way, and it turned out to be better than we ever would have expected. The grandfriends had a blast bopping the balloons with the children, and the children had a blast, as well! A picture is worth a thousand words ... so here are a few for you to enjoy.

And a one and a two ...

Balloons + children + grandfriends = fun!

HAND WASHING FACTS

Did you know that 80 percent of all infectious diseases are transmitted by touch? Without a vaccine, the most important thing you can do to prevent getting the flu is to wash your hands frequently. Washing your hands using soap and water for approximately 15 seconds is preferred. Antibacterial hand sanitizers are located throughout the building in common areas to encourage everyone in Regal to practice good hand hygiene. Help us keep Regal healthy by doing your part; wash your hands frequently!

Stay healthy!
